

**SPORTS FACILITIES:** Renzo Barbera in Palermo

Bericoplast has supplied 23,000 seats of Omega series within the restructuring of some sectors of Renzo Barbera in Palermo stadium, a soccer team that is going to take part to the future Europe League.

In fact, according to UEFA, the new seats shall be equipped with the back and the participation of Palermo to the Europe League requests the team to comply with the regulations immediately.

The seats are made of polypropylene with anti-UV and fireproof treatment and they perfectly comply with the UEFA regulations. Each seat is directly fixed to the horizontal part of the step by means of three anchors.

The intervention, concerning the sectors of the Northern and Southern end, required the supply of green color seats, but Bericoplast is able to meet the most different color needs, also customized ones.

**NEWS:** Certification ISO 9001:2008

On April 9 2010, Bericoplast has obtained the certificate of conformity to the quality standards in compliance with the parameters ISO 9001:2008 from RINA, one of the most important and old classification companies known worldwide.

For Bericoplast, the certification has the strong strategic importance of increasing the value of the more than forty years' experience and commitment of the company, by protecting it from the unqualified competitors and by granting the consume the quality and reliability of its own products.

This certification, in fact, has a dual purpose: on one side it allows the consumer to choose according to objective parameters and to make the right choice and, on the other side, it helps certified companies to have shared and unified reference standards in order to rationalize and simplify their activities.

**EVENTS:** Expo Estádio di Rio de Janeiro

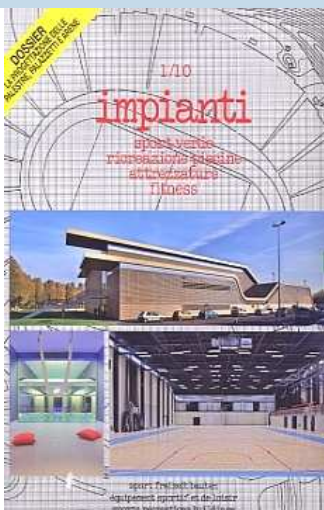

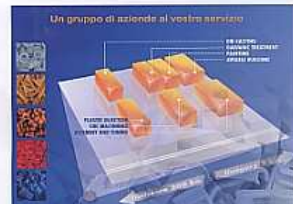

Next October (October 6-8 2010) Bericoplast will take part to Expo Estádio of Rio de Janeiro in Brasil, an exhibition dedicated to those companies designing, manufacturing and managing sport plants in Brasil.

Bericoplast participates in partnership with Flexform, a modern and dynamic manufacturing company located in Cumbica - Guarulhos - SP. The tested partnership of the two companies allows a technical-productive and commercial synergy capable of generating an actual added value in technical and service terms for the end customer.

The exhibition in Rio de Janeiro is part of the commercial events in preparation of the World Cup FIFA 2014 and of Brasil application in order to host the Olympic Games in 2016.
